The disease was brought upon steamships, and much of the alarm that was felt was due to the knowledge that cholera might be carried all over the land by the railroads. The importance of railway sanitation had long been known to experts, and the presence of cholera at our doors served to inform the public. Fortunately, in 1892, the disease was confined to New York. Recognizing the probability of a recurrence of the danger and the possibility of a more serious invasion in 1893, and anxious to be ready for any emergency, the officers of the Pennsylvania Railroad Company determined to have thoroughly tested, with respect to its efficiency or germicidal power, a disinfectant of their own manufacture, which, since 1885, they have been using in their cars, closets, urinals, passenger stations, freight-houses,...
