## FAULT CURRENT MONITORING IN ELECTRICAL INSTALLATIONS

Vde Verlag Gmbh Feb 2004, 2004. Buch. Book Condition: Neu. 297x210x15 mm. Neuware - Fehlerstrom-Überwachung durch Differenzstrommessung in elektrischen Anlagen ist eine neue Maßnahme der vorbeugenden Instandhaltung. Besonders häufig werden dazu geeignete Geräte eingesetzt, um durch Isolationsfehler entstehende Ausfallzeiten in elektrischen Anlagen zu verhindern und um die damit verbundenen Kosten zu reduzieren. Mit dieser Art der Überwachung (RCM nach DIN EN 62020) sind durch Isolationsfehler bedingte Differenzströme bereits im Frühstadium erkennbar. In modernen Stromversorgungssystemen können spezielle RCM Differenzströme allstromsensitiv, d. h. auch reine Gleichspannungsisolationsfehler, detektieren. Zur Information für den Anwender der elektrischen Anlage stehen häufig LED-Anzeigen oder Meßinstrumente zur Verfügung. Die Geräte können zusätzlich zu den bekannten Schutzeinrichtungen verwendet werden. In diesem Werk werden Anwendung und Meßtechnik von Differenzstrom-Überwachungsgeräten in Wechsel- und Gleichspannungssystemen beschrieben. Fault Current Monitoring with the method of residual current measurement in electrical installations is a new method of preventive maintenance. Often suitable devices are applied to detect insulation faults early in order to prevent break-down times of the electrical installation due to insulation faults and hence reduce the cost-factors for business and industry. Monitoring with residual current monitor (RCM) according to IEC 62020, enables the detection of residual currents due to insulation faults in the early stages. In modern electrical power supply systems specially designed residual current monitors (RCM) are able to detect residual AC and DC currents. This means that it is now possible to measure insulation faults with fractions of direct voltage in AC systems as well as insulation faults in pure DC systems and to indicate and give warning when the critical value has been exceeded. For the information of the operator and user of electrical installations, residual current monitors (RCM) are often equipped with LED-displays, which indicate the respective residual current mostly in relation to the operate value. RCMs can be applied...
