Reviews

Great electronic book and valuable one. It really is simplistic but surprises within the fifty percent from the book. Its been printed in an extremely simple way in fact it is merely right after i finished reading this publication by which in fact modified me, change the way i really believe.

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 191 Publisher: Metallurgical Industry Pub. Date :2011-08-01 version 1 by Pan Qinglin editor of the material of modern analytical testing laboratory tutorial introduces the experimental materials. modern analytical methods. techniques and tools. including materials. X-ray diffraction analysis. electron microscopy analysis. and spectroscopy. spectroscopy and spectral analysis of 34 typical and common experiments. Each experiment Ji explained experimental purposes. the basic principles and experimental content. but also describes the experimental equipment. experimental procedures and methods. and proposed reporting requirements for experiments designed to test materials for the teaching of modern analytical testing to provide guidance. Materials modern analytical Experimental Course can be used as materials science and engineering universities undergraduate and graduate experimental instructions. also available in materials analysis and testing of technology-related professional engineering and technical officers. Contents: Chapter X-ray diffraction experiments 1X-ray diffraction structure. principles and use of experimental phase qualitative analysis of experiment 2 3 4 phase quantitative analysis of experimental lattice constant of the accurate measurement of the stress test with 5 sub-grain size of micro-measurement experiment 6 surface residual stress (macroscopic stress) measurement experiments 7 8 experimental determination of the texture structure of amorphous materials. the determination of the radial distribution function analysis of electron microscopy experiments Chapter 9 Scanning electron microscopy of the structure. working principle and the use of experiment 10 SEM secondary electron image of fracture surface analysis and scanning electron microscopy experiments 11 backscattered electron image and the experimental observation of 12 high-powered organization backscattered electron diffraction structure analysis of transmission electron microscopy experiments 13. 14 imaging principle and the use of experimental TEM sample preparation A typical experiment 15 TEM observation of the organization selected area electron diffraction...
